

Sexual Misconduct Institute

The Sexual Misconduct Institute track is a practitioner led institute that seeks to increase the capacity of those who work with sexual misconduct cases on their campus. The institute goes beyond basic compliance and understanding of legal requirements to a trauma informed approach to investigations that are informed by cultural competence.

The agenda below includes the topics that will be covered during the Institute. It is not uncommon for the topics to move around during the week based on the needs of the participants and may not be covered on the assigned days.
